

IMPORTANT NOTICE - RE EXTENSION TO PREMISES AT SEA MILLS SURGERY

In order to continue to provide excellent, effective and caring health services to our patients we would like to extend our premises. The proposed extension will include:

1. An onsite Pharmacy
2. 2 additional Consulting Rooms
3. Increased administration space
4. Some additional parking

The Pharmacy will:

- Give patients access to another healthcare professional
- Provide easy access for patients visiting the surgery
- Enable issues about patient care to be resolved more quickly
- Allow for improved communication with the Practice.

The Pharmacy will dispense and sell medication only and we therefore envisage little or no passing trade.

Extension to existing premises

The additional Consulting rooms and administration space are a necessary requirement. We already struggle at times to carry out our duties within the space we have available and additional housing will inevitably increase our list size.

Our architect has applied for planning permission on our behalf to Bristol City Council.

The plans will be available from Bristol City Council and there will be the statutory period of time to view the plans and raise any queries.
